

ProSystem *fx* Engagement Database Backup and Restore Utility Update (Version 4.9 only)

Description

ProSystem *fx* Engagement utilizes multi user mode for the Engagement databases to allow multiple users to synchronize to the Central File Room at the same time. The ProSystem *fx* Engagement Database Backup and Restore Utility has been updated to minimize the occurrence of the Central Admin database being left in single user mode after the Database Backup and Restore Utility is run.

This update only needs to be applied to the Engagement Office Servers.

Note: If the Engagement Administrator module is reinstalled at a later time, this update should be reapplied to the Office Server.

How to install:

1. Close ProSystem *fx* Engagement before running this update.
2. [Download](#) the **BackupRestoreUtil.exe**.
3. After the download is complete, find the downloaded **BackupRestoreUtil.exe**.
4. Browse to the x:\Pfx Engagement\Admin\Utilities\Backup Restore directory and save the downloaded **BackupRestoreUtil.exe** in this directory.
5. Select Yes to overwrite the existing file. Alternatively, you may rename the existing BackupRestoreUtil.exe before saving the downloaded file in the directory.
