

ProSystem fx Engagement Update February 2009 (Applicable for Version 4.5 through 5.7)

Description

This update addresses the following specific scenarios which will be rare in most environments. If the following scenarios are not present, it is not necessary to run this update.

Microsoft Vista users will experience GPF error messages within ProSystem fx Tax 2008 immediately after printing a tax return from ProSystem fx Tax and selecting to save the printed return into an Engagement binder. This issue affects Vista users only.

On workstations where the Launch Separate Instances for Excel is unchecked, if workpapers from different binders are open at the same time it is possible that the TB Links may reflect numbers from the wrong trial balance until the workpaper is refreshed. This issue affects TB links in ProSystem fx Engagement v. 5.7 only.

A Temporary or Permanent designation is incorrectly required if a Federal Tax Journal entry is made to an account that is grouped to S-Corp groupings K16B, K16C and K16C.01. This issue affects the 2008 S-Corp tax code grouping only.

This update should be run on all workstations and Terminal Server/Citrix environments that have:

ProSystem fx Engagement Workpaper Management v. 5.7 installed, or
Running Microsoft Vista when interfacing with 2008 ProSystem fx Tax, or
The 2008 S-Corp tax groupings K16B, K16C or K16C.01 are used.

How to install:

1. Close ProSystem fx Engagement before running this update.
2. Close Microsoft Office application such as Word, Excel, and Outlook.
3. [Download](#) this self-extracting UpdateFeb2009.msi file.
 - a. If you are installing locally on a machine with Microsoft Windows Vista, you must also download this [UpdateFeb2009Setup.exe](#) installation package. Save both files to the same location on your computer. To complete the installation double click UpdateFeb2009Setup.exe after downloading both files.
4. Double click on UpdateFeb2009.msi to begin the installation.
5. Follow a few easy steps to finish the update.

NOTE: This update should be reinstalled after an install or repair of ProSystem fx Engagement or the 2008 Tax Grouping Update Wizard.
