Important Notes:

- We recommend that you install the CCH ProSystem fx Trial Balance Tutorial.
- Workstation setup does not need to be run on the machine where the network install was performed.
- **Attention Citrix® MetaFrame and XenApp® Users:** We do not support installing CCH ProSystem fx Trial Balance from a remote workstation to your Citrix® server. Installations should be performed at the server PC. To install Trial Balance on your Citrix® server, you must log on as an administrator and run the install and workstation setup through Add/Remove Programs on the Control Panel. Doing this ensures that the .INI and .DLL files are properly installed into Citrix® system directories. Please refer to your Citrix® documentation for additional information.
- **Attention QuickBooks® Users:** This release does not support QuickBooks® 2015. Once an update is available, we will release an update for you to use QuickBooks® 2015 with CCH ProSystem fx Trial Balance.
