

CCH® ProSystem fx® Engagement

Welcome to Engagement 2023.2.1

This bulletin provides important information about the 2023.2.1 release of CCH® ProSystem fx® Engagement. Please review this bulletin carefully. If you have any questions, additional information is available on CCH [Support Online](#).

Important: Information on installing Engagement is in the Knowledge Base article [Installation Guidance for CCH ProSystem fx Engagement](#) on CCH Support Online. Also, a *Deployment Planning Guide* is available in the Documents folder with the Install Media.

Deployment Information

2023.2.1 Provided on Software Delivery Manager

This Engagement 2023.2.1 release is only available through Software Delivery Manager and uses an MSI for upgrading your workstations. It will not be available to download directly from our Support site.

The following firms should install this 2023.2.1 release on all servers and workstations:

- Your firm has not previously installed a release of Engagement.
- Your firm is upgrading from a 2021, 2022, or prior 2023 release of Engagement to work with all features and resolved issues.

Note: For firms with an earlier version of 2023 already installed, there is no database upgrade when deploying this latest release. This allows for workstations to be upgraded separately from the server. A firm can work in a mixed environment if all machines have any 2023 release installed. We do, however, highly recommend that all workstations are updated with this release.

Included from Prior 2023.1.1 Release

This 2023.2.1 release includes all updates from the prior 2023.1.1 release of CCH ProSystem fx Engagement and CCH® ProSystem fx® Knowledge Coach. The list of items from that prior release can be found in [CCH ProSystem fx Engagement 2023.1.1 Release Notes](#) as provided on CCH Support Online.

Supported Technologies

Supported technologies:

- Microsoft® Windows® 11
- Microsoft® SQL 2022
- Microsoft® Server® 2022
- Adobe® Acrobat® Standard and Professional 64-bit

Recommended Best Practices from Our Support Team

Following are some best practices recommended by our Support team:

- Create scheduled tasks for backing up your databases and managing central bins.
- When rolling out new computers, deploy 64-bit SQL.
- For your Microsoft® Office 365™ subscription, we recommend the semi-annual channel or manually scheduled updates.
- Before upgrading your operating system, please refer to this [Knowledge Base article](#).
- Engagement may not work as expected if there is insufficient drive space when upgrading Microsoft® Windows® 10. The application may require a repair to address component errors after deploying major version updates.
