

CCH® ProSystem fx® Trial Balance

Welcome to CCH ProSystem fx Trial Balance 2016.a01

This bulletin provides important information about the 2016.a01 release of CCH® ProSystem fx® Trial Balance. Please review this bulletin carefully. If you have any questions, additional information is available on CCH [Support Online](#).

New in this Release

Import from QuickBooks® 2017 to CCH ProSystem fx Trial Balance

QuickBooks® 2017 trial balance data can be imported directly into CCH ProSystem fx Trial Balance. This includes continued support of import from versions 2012 - 2017. The QuickBooks® company file must be open when importing from QuickBooks® into CCH ProSystem fx Trial Balance.

Instructions for Downloading and Installing

1. Launch Software Delivery Manager.
Note: If Software Delivery Manager is not installed on your system, please click [here](#) to download and run the **ClientSetup.exe** file. A wizard will open and guide you through the installation. When the installation is complete, then launch the Software Delivery Manager.
2. Log in using your ProSystem fx SSO login credentials. Click [here](#) to setup Single Sign On (SSO) for the first time.
3. Once logged in, select CCH ProSystem fx Trial Balance. You will see the 2016.a01 release and the release notes.
4. Select to view the release notes for release information.
5. Download the CCH ProSystem fx Trial Balance release version 2016.a01.
6. Double-click the **2016 Trial Balance.exe** file to begin the installation. Click [here](#) for more information on installing.

Important Notes:

- We recommend that you install the CCH ProSystem fx Trial Balance Tutorial.
- Workstation setup does not need to be run on the machine where the network install was performed.
- **Attention Citrix® MetaFrame and XenApp® Users:** We do not support installing CCH ProSystem fx Trial Balance from a remote workstation to your Citrix® server. Installations should be performed at the server PC. To install Trial Balance on your Citrix® server, you must log on as an administrator and run the install and workstation setup through Add/Remove Programs on the Control Panel. Doing this ensures that the .INI and .DLL files are properly installed into Citrix® system directories. Please refer to your Citrix® documentation for additional information.
