

**iTransact, Inc.**

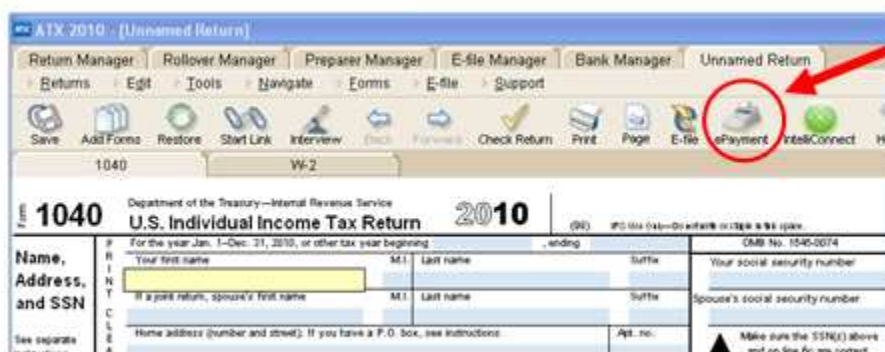

**ATX™**

## Process payments through your ATX tax software

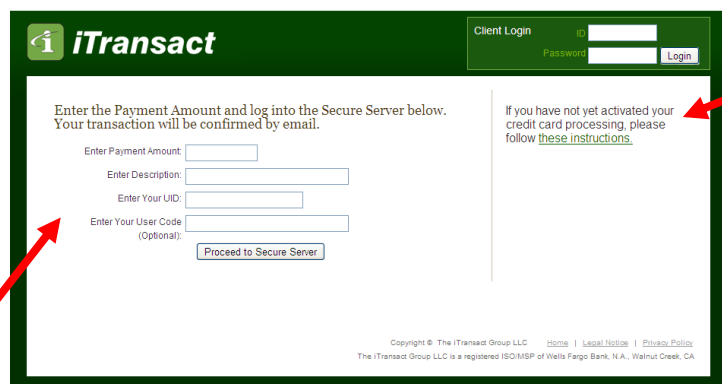

CCH Small Firm Services (SFS) has partnered with iTransact to offer SFS customers a convenient, secure and affordable method of processing credit card, debit card and check transactions. And now it's easier than ever because the 2010 ATX tax program includes a link to the iTransact web portal for processing these payments online.

## Getting Started

In the ATX Tax Preparation program select the **epayment** button located near the top of the screen.

The iTransact website will be displayed.

To activate credit card processing or set up other merchant services, click the link **these instructions** on the right side of the page. If you have already activated your merchant services account, enter payment information on the left side of the page.

You can use iTransact to process payments for any product or service you offer. For easy access outside the ATX tax program, save the iTransact Login page as a favorite in your web browser.

If you need more information or require assistance to get started, call iTransact at **1-877-812-5174**.

## About iTransact

iTransact has been helping businesses with payment processing since 1994.

iTransact offers merchant accounts to all business types and sizes. With an iTransact merchant account, merchants can integrate a physical terminal or Internet-based payment gateway with their physical or virtual store. Merchant options include standard or customized programs, swipe or virtual terminal acceptance, credit, debit, e-checks, or gift card programs. Accounts can be set up to operate individually or integrated with existing systems.
