Energy credit	Solar energy equipment
Field Conversion Table	
Description #1 and #2	Description
Asset A/C#	GL Asset Account
A/C Name	Category
Valuation	User Defined 7
Sort Code #1	User Defined 3
Sort Code #2	User Defined 4
Sort Code #3	User Defined 5
Sort Code #4	User Defined 6
Expense A/C#	GL Depr./amort. Exp. Acct.
Accum. A/C#	GL accum. Depr. Amort. Acct.
User Defined #1	User Defined 1
User Defined #2	User Defined 2

Conversion Notes:

1) The "New" or "Used" designation for ITC property cannot be converted.
2) Sort codes are converted to user defined 3-6.
3) In File/Client Information/Calculation options:

   If the box 'Eligible for bonus depreciation and increased Section 179 under the Gulf Opportunity Zone Act?' is checked: All eligible assets will be considered GO Zone assets and Section 179 will be increased based on those assets.
   On the book tab of any eligible assets, if 'Take AFY Depr.' is checked: The asset is taking Section 168k and Depreciation will be calculated based on that.
4) All assets eligible for RRESAPA will be listed in the exceptions report. However, only those that have the 'take AFY Depr.' will convert with the 50% bonus or 100% bonus.
5) Can only import into CCH ProSystem fx Fixed Assets from Asset Keeper Pro.

Technical Notes:

1) Asset Keeper Pro does not need to be installed to perform a conversion into Fixed Assets, but need the *.akp file.
2) Asset Keeper Pro needs to be closed before converting file into CCH ProSystem fx Fixed Assets.
3) Conversion components will require Microsoft .Net Framework 4.6.2 Client Profile.
