CCH Axcess iQ

Welcome to CCH Axcess iQ 2020 3.1

This bulletin provides important information about the 2020 3.1 release of CCH Axcess iQ. Please review this bulletin carefully. If you have any questions, additional information is available on CCH Support Online.

New in this Release

Affected Client List Reporting Columns:

Narrowing your events list just became easier!

Add columns to your affected clients list that represent how each return qualified for a specific event.

Each event now provides unique reporting columns that will increase productivity and accuracy by confirming how each client met specific criterion.

Filter by Jurisdiction:

Filter tax events by jurisdiction to pinpoint specific events. This filter will support upcoming state events.

The Jurisdiction filter helps manage large event lists. This filter helps you remove clutter from your view and allows you to see only the jurisdictions you care about!

 iQ Event Change Log:

Take note of the newest legislative events and impacted clients!

The iQ Event Change Log notifies you of the newest titles as well as which titles have been updated to support the newest tax year.

Note: The initial dates in the change log will start with "Today" (the release of v3.1).

Performance and stability improvements:

Technical changes have been made regarding SQL Performance Tuning and improved processing activity. These changes help increase the responsiveness and stability of the application improving you experience with CCH Axcess IQ.
