

CCH Axxess™ Practice

Welcome to CCH Axxess Practice 2016-2.3

This bulletin provides important information about the 2016-2.3 release of CCH Axxess Practice. Please review this bulletin carefully. If you have any questions, additional information is available on CCH [Support Online](#).

New in this Release

Clocks

If you have a running clock, your session is now considered to be active and will not time out after 30 minutes. This activity is recognized even if you are not currently working in CCH Axxess.

Important: If your computer reaches the 30-minute timeout limit while in sleep mode, your session will time out, regardless of whether a clock is running. We recommend reviewing your computer's power management settings to ensure that your computer does not go into sleep mode prematurely.
