NEW IN THIS RELEASE
ProSystem *fx* Practice (SaaS)

Time Capture

Technical corrections made to Daily Entry with this release include:

◆ To enter time for yourself, the **Time Keeper security setting** of "Time transactions for self" no longer has to be increased to "Time transactions for others" in order to prevent the system from occasionally closing.
◆ Having **insufficient user rights to Projects** no longer causes the system to occasionally close. A message will now display alerting if rights are insufficient and advising you to contact the administrator.
◆ The **Project and Workstep lookups** will now allow searches by Name or ID.
◆ The **Staff lookup** will now display the name and ID of the current user by default.
◆ The **Service code lookup** now retains the full lookup list for subsequent transactions without needing to refresh the list by making a change in the filter settings.
