

CCH Access™ Workstream

Welcome to CCH Access Workstream 2021-3.4.

This bulletin provides important information about the 2021-3.4 release of CCH Access Workstream. Please review this bulletin carefully. If you have any questions, additional information is available on CCH [Support Online](#).

New in this Release

Save Template Improvements

We have significantly improved the performance of saving large templates. As a result of these improvements, you will no longer be able to lock a new workstep or form due date to push the new item down to all existing projects. Instead, the most efficient way to make changes to your existing projects is to have the projects pick up changes at roll forward. For information on how to add worksteps to multiple existing projects, see [How do I add a new Workstep to multiple Projects at once?](#). For information on how to add a form due date to multiple existing projects, see [How do I add a new Form to multiple existing Projects?](#).

CCH Access Open Integration Platform

CCH Access REST API documentation has been moved to the [CCH Access Developer Portal](#). Any CCH Access user may login.

New capabilities are coming to the Developer Portal soon! Please add Open Integration Platform to your [CCH Software News profile](#) in order to be notified.
