<http://support.cch.com/Access/releasenotes>

By accessing this site you can view helpful information for all CCH Access Products, including:

- ◆ Release Bulletins
- ◆ CCH Access Support Calendar
- ◆ Your e-*fx*News Profile
- ◆ Training Videos
- ◆ Speed Tests

Please visit the [CCH Access Application Status](#) Web page to view in real time the current status of any of the Access applications. The Application Status Web page is updated every 15 minutes. You can visit this site at any time, including when support is closed.

Technical Corrections

Technical corrections in this release include:

- ◆ Projects created as a result of roll forward contain the appropriate workstep settings.
- ◆ When marking a workstep complete from a route sheet, you can save and close the route sheet without error.
- ◆ The Reopen Workstep option displays appropriately on the right- click menu when working with closed worksteps.
- ◆ Users with proper security permissions can mark worksteps complete when the workstep is assigned to another staff.
- ◆ The Office and Business Unit fields on the project are no longer blank for a staff with all Workstream permissions and access to all offices.
- ◆ Staff can now save a project when they do not have permission set to Granted for Views.
