## Installing CCH ProSystem fx Fixed Assets

---

Refer to the CCH ProSystem fx Fixed Assets Instruction Guide for complete information on installing and using CCH ProSystem fx Fixed Assets.

### Please follow the instructions below to install this release:

Real Time Virus Scan Reminder: The Fixed Assets directory structures must be excluded from the virus scan on workstations and servers for the program to install and/or run properly.

#### Installation Steps:

1. Download the release image from Software Delivery Manager. You will be asked to Save the self-extracting executable. It is recommended to save the file to the default location.
2. Double-click the self-extracting executable, to launch the installation. If the files are extracted already, then select **Start > Run** and type `?:\Setup` (where ? represents the location of the install files) and click **OK**.

3. At the Permission File screen, select one of the permission key options to find your 2015 permission key and click **Next**. The option to download your permission file from the Internet requires a Single Sign-On (SSO) account login.
4. Click **Next** on the Welcome screen to display the type of installation dialog.
5. Select either a Network or Standalone install.
6. Click **Next** to continue.
7. Select the destination location for the program files. You can accept the default location or browse to a different location.
8. Click **Next** to continue.
9. Select the destination location for the client data. You can accept the default location or browse to a different location.
10. If you are doing a Network install, you must select the location of the work folder where your backup files are stored. Accept the default location or browse to a different location.
11. Select the features you want to install.
12. Click **Next** to continue.
13. Select the desired program group for your CCH ProSystem fx Fixed Assets icon.
14. Click **Next** to continue.
15. Click **Install** to begin the installation.
16. Once the installation is complete, reboot your PC to ensure that all system files are properly initialized.

**Note:** When installing from a network, you must run ?:\FixedAst\setup (where ? is your network drive) on each workstation that will run Fixed Assets. The type of installation defaults to Workstation Setup. Each workstation must be rebooted after workstation setup is complete.
