ProSystem *fx*
Knowledge Coach
August 2013

Release
Bulletin

Welcome to the latest version of *2013 Knowledge-Based Compilations and Reviews (8/27/13)*, the latest title available in the ProSystem *fx* Knowledge Coach series! Please review this bulletin prior to installation and use. If you have any questions, call Technical Support at **1-800-PFX-9998, option 4**.

2013 Knowledge-Based Compilations and Reviews is designed to help the accountant efficiently and effectively perform financial statement compilations and reviews of nonpublic commercial entities in accordance with Statements on Standards for Accounting and Review Services (SSARS) issued by the Accounting and Review Services Committee (ARSC) of the American Institute of Certified Public Accountants (AICPA).

The Knowledge-Based Compilation and Review (KBCR) Methodology emphasizes using knowledge of the entity to perform compilation and review engagements by facilitating the flow of information so that the understanding obtained in each process affects the decisions made in the next. Although the accountant will likely perform most steps in this methodology sequentially, conducting an engagement is not necessarily a linear process. Knowledge gained from preliminary engagement activities helps the accountant design and customize engagement procedures; evidence gained from procedures performed is evaluated and the appropriate accountant's report is issued. This edition includes specific up-to-date guidance for conducting compilation and review engagements in accordance with the SSARS. This document is published for the purpose of communicating, to users of the toolset, updates and enhancements included in the current version. This document is not, and should not be used as, a program to update the engagement documentation of an engagement started in a previous version of this product.

This is the fourth update to this Knowledge Coach title. If you are updating from a previous version of this title refer to the Knowledge Coach User Guide Chapter 12. The guide is found on the Engagement File Room Help menu.

The 2013 documents include Accounting Research Material links to specific guidance that provides instant access to detailed analysis related to the steps and processes discussed in the workpapers.

For more information on the Knowledge-Based Methodology and how it works within ProSystem *fx* Knowledge Coach, refer to the [Additional Information](#) section in this bulletin.

ProSystem fx® Knowledge Coach

ProSystem fx® Knowledge Coach functionality allows accountants to use the Knowledge-Based methodology more efficiently by eliminating the need for duplicate entry of the same information, tailoring documentation to each particular engagement, and documenting procedures performed. **CMP-100 Tailoring Question Workpaper** or **REV-100 Tailoring Question Workpaper** are documents in Knowledge Coach that presents engagement-level questions designed to aid in tailoring the engagement documentation to fit each client. Completing the questions helps the accountant avoid duplication and unnecessary workpapers.

Before you begin your engagement, please review the guidance in **CMP-101 Overall Compilation Program** or **REV-101 Overall Review Program**. These workpapers are intended to be your road map through the Knowledge-Based methodology. You should start your engagement with **CMP-100 Tailoring Question Workpaper** or **REV-100 Tailoring Question Workpaper** and **CMP-101 Overall Compilation Program** or **REV-101 Overall Review**.

The Risk Assessment features have been disabled for the 2012 Knowledge-Based Compilations and Review Title for Knowledge Coach. Refer to **KBC-101 Compilation: Significant Matters** and **KBR-102 Review: Significant Matters** to accumulate and review significant issues and findings. **CMP-801 Compilation Program: Significant Risks and Uncertainties** and **REV-802 Review Program: Significant Risks and Uncertainties** provides a guide for implementing the guidance related to the disclosure of certain significant risks and uncertainties.

Information Flow helps cut down on the time spent duplicating information across forms. In addition, the flow of consistent information ensures that information and updates to information are not missed between workpapers. Drill-down functionality helps the user navigate quickly to the source of the information, aiding in the review of the engagement file.

Diagnostics help you keep track of unresolved issues like unanswered questions, incomplete risks, program steps not linked to risks or relevant assertions, missing workpaper, and more.
