New in this Release

Knowledge-Based Audits of Commercial Entities is designed to help the auditor efficiently and effectively perform financial statement audits and, when applicable, audits of internal control over financial reporting, of nonpublic commercial entities in accordance with auditing standards generally accepted in the United States of America (U.S. GAAS). The knowledge-based audit is a risk-based methodology that emphasizes using knowledge of the entity to make risk assessments in connection with a financial statement audit. This allows the auditor to more appropriately focus audit efforts on those areas which in the auditor's judgment are the most significant and pose the most risk of material misstatement to the financial statements. The Knowledge-Based Audit tools include documents, audit programs, practice aids, correspondence, and example reports. The tools also include interpretive guidance, workpapers, review programs, checklists, and correspondence necessary to complete reviews of interim financial information in accordance with AU-C 930, Interim Financial Information, should this be required as part of the engagement.

Conducting audits of nonpublic commercial entities requires the exercise of the auditor's professional judgment. Additionally, the operations of nonpublic commercial entities are often unique and complex and may require specialized accounting and auditing knowledge. This edition includes specific up-to-date guidance for auditing nonpublic commercial entities.

This document is published for the purpose of communicating the updates and enhancements included in the current version to users of the toolset. This document is not, and should not be used as an audit program to update the audit documentation of an engagement started in a previous version of this product.

This is the eighth update to this Knowledge Coach title. If you are updating from a previous version of this title, refer to the Knowledge Coach User Guide Chapter 12. The guide is found on the Engagement File Room Help menu.

The 2016 documents include Accounting Research Material links to specific guidance that provides instant access to detailed analysis related to the steps and processes discussed in the workpapers.

The 2016 edition of Knowledge-Based Audits of Commercial Entities features numerous enhancements, including:

- ◆ Added a tailoring question in AUD-100 in response to SAS No. 130, which asks if the auditor will be performing an audit of internal controls over financial reporting that is integrated with the audit of financial statements. This tailoring question will show/hide procedures in AUD-101, AUD-701, AUD-901, KBA-201, KBA-412, KBA-904, AID-601, and AID-903 based on the user's answers.
- ◆ AUD-903 and AUD-904 have been streamlined and minimized for duplication elsewhere. Some steps in AUD-903 have been moved to KBA-501. Important Note: If KBA-501 wasn't included in your binder prior to roll forward please insert it before you roll forward so that any documentation for these steps in AUD-903 will retain on roll forward.
- ◆ AUD-802 Audit Program: Securities, Derivatives, and Hedging has been split into AUD-802A Audit Program: Investments in Securities and AUD-802B Audit Program: Derivative Instruments and Hedging Activities. AUD-802B is a completely new audit program; therefore, you should publish the AUD-802 audit program before updating so that you can re-populate any customization or data in AUD-802B.
- ◆ Due to this split, the Investment in Securities, Derivative Instruments, and Hedging Activities audit area from the 2015 Commercial Title is split into two separate audit areas in the 2016 title: 1) Investments in Securities and 2) Derivative Instruments and Hedging Activities. If the user selected the combined audit area as applicable in 2015 and retains on roll

forward only the “Investments in Securities” audit area will retain on roll forward. Please see KCO-001 for further information on roll forward considerations.

- ◆ A new section is added to AID-201 to address “Threats and Safeguards” in regards to auditor independence.
- ◆ A new table is added to KBA-101 for users to document why the auditor isn’t testing the operating effectiveness of internal controls. If the auditor has selected in AUD-100 that the auditor is performing an integrated audit or operating effectiveness of internal controls will be tested then this table will be hidden.
- ◆ KBA-105 has been reorganized so that the user will add entries to column 1 instead of column 3 so the flow is more logical.
- ◆ New columns have been added to AID-701 which will allow the user to select whether the assertion is relevant or not. For any assertion marked as not relevant the user will NOT need to complete the planned level of control risk. The selections made in this new column will flow to other areas of the workpaper so the user doesn’t have to re-select an option.
- ◆ A comments column has been added to KBA-400 Scoping and Mapping Table and in KBA-502 Assertion Level Risk Table. No diagnostic will appear in these columns if they are left unanswered.
- ◆ An option for a Not Applicable answer has been added to question 9 of AUD-602.
- ◆ A new Not Applicable option has been added in KBA-103 column 15, “If Not a Material Weakness, Is It Important Enough to Merit Attention by Those Charged with Gov.?”
- ◆ Changes have been made to address issues with risk information not flowing correctly to KBA-40x series workpaper when cash receipts/cash disbursements have been selected.
- ◆ Changes have been made to clarify various risk diagnostics so that the correct diagnostics are displayed at the proper time.
- ◆ There are many new CORs, RPTs and RESs including:
 - COR-201A Audit Engagement Letter: Integrated Audit
 - COR-202A Audit Engagement Letter: Integrated Audit When Also Performing Reviews of Interim Financial Information
 - COR-901A Management Representation letter: ICFR

Additional Information on Knowledge Coach and the KBA Methodology

Knowledge-Based Audit (KBA) Methodology - Allows the results of one set of procedures to become the input for the next. The key components of the KBA methodology include:

- ◆ An Overview that guides auditors through the methodology;

- ◆ Knowledge-Based Audit documents, integral to the risk assessment and overall audit processes, which contain steps and procedures required by GAAS;
- ◆ Customizable Audit Programs that take auditors through related steps and procedures;
- ◆ Practice Aids to help auditors complete steps or processes outlined in the Knowledge-Based Audit documents and Audit Programs;
- ◆ Auditor's Reports that provide a variety of sample auditor's opinions on audited financial statements; and
- ◆ Correspondence documents that provide sample letters to be used to comply with GAAS requirements and in many other common situations.
- ◆ The AICPA's Auditing Standards Board's (ASB) Risk Assessment Standards - The practice aids and tools in the 2016 Knowledge-Based Audits of Commercial Entities are designed around the AICPA's risk assessment and clarified standards to assist auditors of nonpublic Commercial entities by:
 - Facilitating compliance with GAAS and GAGAS;
 - Encouraging more effective audits through tailored audit programs and comprehensive practice aids;
 - Helping auditors to focus on and respond to identified audit risks; and
 - Enhancing audit documentation.

ProSystem fx® Knowledge Coach

- ◆ ProSystem fx® Knowledge Coach functionality allows auditors/accountants to use the Knowledge-Based-Audit methodology more efficiently by eliminating the need for duplicate entry of the same information, tailoring audit documentation to each particular engagement, and documenting the link between risks identified and procedures performed. AUD-100 Tailoring Question Workpaper is a document in Knowledge Coach that presents engagement-level questions designed to aid in tailoring the engagement documentation to fit each client. Completing the questions helps the auditor avoid duplication and unnecessary workpapers.
- ◆ Before you begin your audit, please review the guidance in AUD-101 Overall Audit Program. This workpaper is intended to be your road map through a Knowledge-Based Audit methodology. You should start your audit with AUD-100 Tailoring Question Workpaper and AUD-101 Overall Audit Program.
- ◆ Risks can be captured via the Risk Summary task pane from any Knowledge Coach workpaper by the current editor of KBA-502 Summary of Risk Assessments. This allows the user to continuously assess risks during the engagement. Several workpapers prompt the consideration of the presence of risks, but the Risk Summary task pane must be used to document those risks. All documented risks flow to the Risk Summary. To ensure risks show in findings tables, make sure to check the "workpaper identified in" field of the Risk pane.
- ◆ Information Flow helps cut down on the time spent duplicating information across forms. In addition, the flow of consistent information ensures that information and updates to information are not missed between workpapers. Drill-down functionality helps the user navigate quickly to the source of the information, aiding in the review of the audit file.
- ◆ Diagnostics help keep track of unresolved issues like unanswered questions, incomplete risks, program steps not linked to risks or relevant assertions, missing workpaper, and more.
- ◆ **Links to Accounting Research Manager (ARM)**-If you subscribe to an ARM library that includes audit content, you can link directly to source material from Resources within Knowledge Coach workpapers. These links have been updated to reference to the accounting standards under the FASB Accounting Standards Codifications and the auditing standards issued by the AICPA. Also, if you subscribe to the Knowledge-Based Audits of Commercial Entities Guide on ARM, you can take advantage of links to the audit guide material from within the Knowledge Coach documents.
- ◆ Interpretive Guidance is integrated into each Knowledge Coach template through the Tips view of each new task pane. Informational features include Practice Points, Examples, Optional Workpapers, and Resources to help auditors work more effectively and efficiently. You can also navigate from Resources within a document or the tip pane directly to CCH's Accounting Research Manager and industry audit guides by simply clicking on the Reference.
