**New in this Release**

Knowledge-Based Audits of Dealerships is designed to help the auditor efficiently and effectively perform financial statement audits of dealership entities in accordance with auditing standards generally accepted in the United States of America (U.S. GAAS) promulgated for nonpublic entities by the AICPA's Auditing Standards Board. This publication is applicable for all types of dealership entities, including vehicle and equipment dealers.

The operations of dealerships are generally unique and complex and require specialized accounting and auditing knowledge. Dealerships face some unique accounting and reporting challenges (e.g., inventory; financing income; insurance income; commissions; warranties, and repossession losses) that auditors should be aware of when planning and performing the audit engagement.

This specialized dealership approach contains documents and audit programs that have been developed to help the auditor apply an audit approach. Entities may have other material transactions that will require additional procedures not anticipated by the KBA methodology. The auditor needs to design appropriate procedures and incorporate them into the engagement plan.

Conducting audits of dealerships requires the exercise of the auditor's professional judgment.

The 2016 documents include Accounting Research Material links to specific guidance that provides instant access to detailed analysis related to the steps and processes discussed in the workpapers.

The 2016 Knowledge-Based Audits of Dealerships is current through:

- ◆ FASB Accounting Standards Codification as of March 31, 2016, and through Accounting Standards Update (ASU) No. 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting.

The tools in Knowledge-Based Audits of Dealerships have been updated to incorporate the 2013 Internal Control-Integrated Framework (Framework) established by the Committee of Sponsoring Organizations of the Treadway Commission, independence considerations, and in accordance with changes in the AICPA Code of Professional Conduct, including the Compliance with Standards Rule (ET Section 1.310.001). Additionally, the tools are current through AICPA Statement on Auditing Standards (SAS) No.129, Letters for Underwriters and Certain Other Requesting Parties.

Knowledge-Based Audit (KBA) Methodology - Allows the results of one set of procedures to become the input for the next. The key components of the KBA methodology include:

- ◆ An Overview that guides auditors through the methodology;
- ◆ Knowledge-Based Audit documents, integral to the risk assessment and overall audit processes, which contain steps and procedures required by GAAS;
- ◆ Customizable Audit Programs that take auditors through related steps and procedures;
- ◆ Practice Aids to help auditors complete steps or processes outlined in the Knowledge-Based Audit documents and Audit Programs;
- ◆ Auditor's Reports that provide a variety of sample auditor's opinions on audited financial statements; and

- ◆ Correspondence documents that provide sample letters to be used to comply with GAAS requirements and in many other common situations.
- ◆ The AICPA's Auditing Standards Board's (ASB) Risk Assessment Standards - The practice aids and tools in the 2016 Knowledge-Based Audits of Dealerships are designed around the AICPA's risk assessment and clarified standards to assist auditors of dealerships by:
  - Facilitating compliance with GAAS and GAGAS;
  - Encouraging more effective audits through tailored audit programs and comprehensive practice aids;
  - Helping auditors to focus on and respond to identified audit risks; and
  - Enhancing audit documentation.

### **ProSystem fx® Knowledge Coach**

- ◆ ProSystem fx® Knowledge Coach functionality allows auditors to use the Knowledge-Based-Audit methodology more efficiently by eliminating the need for duplicate entry of the same information, tailoring audit documentation to each particular engagement, and documenting the link between risks identified and procedures performed. AUD-100 Tailoring Question Workpaper is a document in Knowledge Coach that presents engagement-level questions designed to aid in tailoring the engagement documentation to fit each client. Completing the questions helps the auditor avoid duplication and unnecessary workpapers.
- ◆ Before you begin your audit, please review the guidance in AUD-101 Overall Audit Program. This workpaper is intended to be your road map through a Knowledge-Based Audit methodology. You should start your audit with AUD-100 Tailoring Question Workpaper and AUD-101 Overall Audit Program.
- ◆ Risks can be captured via the Risk Summary task pane from any Knowledge Coach workpaper by the current editor of KBA-502 Summary of Risk Assessments. This allows the user to continuously assess risks during the engagement. Several workpapers prompt the consideration of the presence of risks, but the Risk Summary task pane must be used to document those risks. All documented risks flow to the Risk Summary. To ensure risks show in findings tables, make sure to check the "workpaper identified in" field of the Risk pane.
- ◆ Information Flow helps cut down on the time spent duplicating information across forms. In addition, the flow of consistent information ensures that information and updates to information are not missed between workpapers. Drill-down functionality helps the user navigate quickly to the source of the information, aiding in the review of the audit file.
- ◆ Diagnostics help keep track of unresolved issues like unanswered questions, incomplete risks, program steps not linked to risks or relevant assertions, missing workpaper, and more.
- ◆ Links to Accounting Research Manager (ARM)-If you subscribe to an ARM library that includes audit content, you can link directly to source material from Resources within Knowledge Coach workpapers. These links have been updated to reference to the accounting standards under the FASB Accounting Standards Codifications and the auditing standards issued by the AICPA.
- ◆ Interpretive Guidance is integrated into each Knowledge Coach template through the Tips view of each new task pane. Informational features include Practice Points, Examples, Optional Workpapers, and Resources to help auditors work more effectively and efficiently. You can also navigate from Resources within a document or the tip pane directly to CCH's Accounting Research Manager and industry audit guides by simply clicking on the Reference.
