#### New in this Release

---

Knowledge-Based Nontraditional Engagements is designed to help the practitioner efficiently and effectively perform nontraditional engagements in accordance with applicable standards issued by the American Institute of Certified Public Accountants (AICPA), including Statement on Standards for Attestation Engagements (SSAE) No. 18, *Attestation Standards: Clarification and Recodification*. The Knowledge-Based™ methodology for nontraditional engagements is a risk-based methodology for conducting nontraditional engagements. It emphasizes using knowledge of the entity, subject matter, and suitable criteria to perform procedures and, when applicable, make risk assessments and recommendations in connection with an engagement.

Nontraditional engagements are often unique and complex, and require specialized accounting, and attestation knowledge. Conducting nontraditional engagements requires the exercise of the practitioner's professional judgment. This edition includes specific up-to-date guidance for nontraditional engagements and is published for the purpose of communicating, to users of the toolset, updates and enhancements included in the current version. This document is not, and should not be used as an engagement program to update the documentation of an engagement started in a previous version of this product.

The methodology is presented in terms of its application for attestation engagements including:

- Attestation Engagements:
  - Examination-Level
  - Review-Level
- Agreed-Upon Procedures Engagements (General)
- Prospective Financial Statements:
  - Examination-Level Engagements
  - Agreed-Upon Procedures Engagements
- Pro Forma Financial Information:
  - Examination-Level Engagements
  - Review-Level Engagements
- Entity's Compliance with Specified Requirements or the Responsible Party's Written Assertion:
  - Examination-Level Engagements
  - Agreed-Upon Procedures Engagements
- Management's Discussion and Analysis:
  - Examination-Level Engagements
  - Review-Level Engagements

The forms and practice aids in the knowledge-based methodology will help the practitioner to perform the procedures necessary to complete the engagement in accordance with professional standards. The Knowledge-Based tools include documents, attestation programs, practice aids, correspondence, and example reports.

Although the KBA approach provides a framework for applying attestation standards, it is not a substitute for knowledge of professional standards and the exercise of the practitioner's professional judgment and professional skepticism. The practitioner may need to refer to additional resources to determine how to apply the applicable standards to unfamiliar or unique circumstances.

The Knowledge-Based methodology for engagements to report on controls at a service organization (SOC) is available in a new and separate title, *2017 Knowledge-Based Examinations of Service Organizations*.

The 2017 documents include Accounting Research Material links to specific guidance that provides instant access to detailed analysis related to the steps and processes discussed in the workpapers.

The 2017 edition of Knowledge-Based Nontraditional Engagements features numerous enhancements from the previous content, including:

- ◆ The Compilation and Consulting content has been removed from Knowledge-Based Nontraditional Engagements. Compilation engagements are no longer addressed in the attestation standards. All SOC content was removed and a new title (2017 Knowledge-Based Examinations of Service Organizations) was released on February 23, 2017 to cover these types of engagements.
- ◆ KBA-103 has been removed and all flow of "Control Deficiency" findings will flow to KBA-101 since an evaluation of control deficiencies are not required by the attestation standards. KBA-101 has been updated to ensure that control deficiencies are properly aggregated and communicated.
- ◆ ATT-301 has been replaced by ATT-301N since the requirement in an attest engagement is to understand the subject matter and this would more likely be done in memo form and many of the specific items in ATT-301 would not be applicable. If the user used ATT-301N in the prior release the document will be retained fully and re-indexed as ATT-301. Please remove the old version of ATT-301 from any binder that you roll forward to NTE 2017.
- ◆ A new flow of information from KBA-200 to KBA-501 in regards to the type of reporting, subject matter, and stated criteria.
- ◆ The Inherent Risk section of KBA-502 has been moved into a new workpaper KBA-503.
- ◆ Many new documents in this title as follows:
  - KBA-503 Basis for Inherent Risk Assessment
  - ATT-902 Attestation Program: Subsequent Events
  - AID-101 Overall Examination or Review Engagement Strategy
  - AID-606 Involvement of an Other Practitioner
  - COR-210 Communication with Predecessor Practitioner Prior to Client/Engagement Acceptance
  - COR-211 Request from Entity to Predecessor Practitioner to Release Information to Successor Practitioner
  - COR-905 Representation Letter: Agreed-Upon Procedures over a Financial Forecast
  - COR-907 Representation Letter: Agreed-Upon Procedures over a Financial Projection
  - COR-910 Representation Letter: Compliance Agreed-Upon Procedures Engagement
  - COR-913 Representation Letter: Engaging Party
  - RPT-0919 Review Engagement: Qualified Conclusion on Subject Matter (General Use)
  - RPT-0932 AUP Engagement: Report on Agreed-Upon Procedures in Connection with Claims of Creditors
  - RPT-0950 Agreed-Upon Procedures Engagement: Report on Projected Financial Statements

## Additional Information on Knowledge Coach and the KBA Methodology

Knowledge-Based Methodology for Nontraditional Engagements- Allows the results of one set of procedures to become the input for the next. The key components of the KBA methodology include:

- ◆ An Overview that guides practitioners through the methodology;
- ◆ Knowledge-Based Attestation documents, integral to the risk assessment and overall attestation processes, which contain steps and procedures required by professional standards;
- ◆ Customizable Engagement Programs that take practitioners through related steps and procedures;
- ◆ Practice Aids to help practitioners complete steps or processes outlined in the overall engagement programs;
- ◆ Practitioner's Reports that provide a variety of sample practitioner's opinions on nontraditional engagements; and
- ◆ Correspondence documents that provide sample engagement and representation letters to be used to comply with professional standards, SSAE and SSCS requirements, and in many other common situations.

## ProSystem fx® Knowledge Coach

- ◆ ProSystem fx® Knowledge Coach functionality allows practitioners to use the Knowledge-Based-Audit methodology more efficiently by eliminating the need for duplicate entry of the same information, tailoring audit documentation to each particular engagement, and documenting the link between risks identified and procedures performed. ATT-100 Tailoring Question Workpaper is a document in Knowledge Coach that presents engagement-level questions designed to aid in tailoring the engagement documentation to fit each client. Completing the questions helps the practitioner avoid duplication and unnecessary workpapers.
- ◆ Before you begin your engagement, please review the guidance in ATT-101 through ATT-113 Overall Attestation Programs. These workpapers are intended to be your road map through a Knowledge-Based methodology. You should start your audit with ATT-100 Tailoring Question Workpaper and ATT-101 Overall Attestation Program.
- ◆ Risks can be captured via the Risk Summary task pane from any Knowledge Coach workpaper by the current editor of KBA-501 Summary of Risk Assessments. This allows the user to continuously assess risks during the engagement. Several workpapers prompt the consideration of the presence of risks, but the Risk Summary task pane must be used to document those risks. All documented risks flow to the Risk Summary. To ensure risks show in findings tables, make sure to check the “workpaper identified in” field of the Risk pane.
- ◆ Information Flow helps cut down on the time spent duplicating information across forms. In addition, the flow of consistent information ensures that information and updates to information are not missed between workpapers. Drill-down functionality helps the user navigate quickly to the source of the information, aiding in the review of the audit file.
- ◆ Diagnostics help keep track of unresolved issues like unanswered questions, incomplete risks, program steps not linked to risks or relevant assertions, missing workpaper, and more.
- ◆ **Links to Accounting Research Manager (ARM)**-If you subscribe to an ARM library that includes attestation content, you can link directly to source material from Resources within Knowledge Coach workpapers. These links have been updated to reference to the accounting standards under the FASB Accounting Standards Codifications and the auditing standards issued by the AICPA. Also, if you subscribe to the Knowledge-Based Nontraditional Engagements Guide on ARM, you can take advantage of links to the audit guide material from within the Knowledge Coach documents.
- ◆ Interpretive Guidance is integrated into each Knowledge Coach template through the Tips view of each new task pane. Informational features include Practice Points, Examples, Optional Workpapers, and Resources to help practitioners work more effectively and efficiently. You can also navigate from Resources within a document or the tip pane directly to CCH’s Accounting Research Manager and industry audit guides by simply clicking on the Reference.
