New in this Release

Knowledge-Based Audits of Single Audits

2018 Knowledge Based Audits of Single Audits can be installed on CCH® ProSystem fx® Engagement v2017 by first installing the CCH ProSystem fx Engagement v2017.2.4 Update or later. The latest update can be downloaded [here](#). This update will allow users to work on the 2018 Single Audit title without installing ProSystem fx Engagement v2018 until your firm plans to update.

It is designed to help the auditor efficiently and effectively perform the compliance audit portion of the single audit. The methodology has been developed to be compliant with auditing standards generally accepted in the United States of America (U.S GAAS), Government Auditing Standards (GAGAS), and the audit requirements of 2CFR200, the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, (the Uniform Guidance).

Conducting single audits requires the exercise of the auditor's professional judgment. This document is published for the purpose of communicating the updates and enhancements included in the current version to users of the toolset. This document is not, and should not be used as an audit program to update the audit documentation of an engagement started in a previous version of this product.

If you are updating from a previous version of the this title, refer to the Knowledge Coach User Guide Chapter 12. The guide is found on the Engagement File Room Help menu.

The 2018 documents include CCH® Accounting Research® material links to specific guidance that provides instant access to detailed analysis related to the steps and processes discussed in the workpapers.

2018 Edition of Knowledge-Based Single Audits

This edition features numerous enhancements, including:

- The type of finding, "Noncompliance" has been modified as, "Noncompliance or Abuse." Current findings listed as "Noncompliance" will retain on roll forward if set to keep.
- New and reorganized columns in the workpapers documenting internal controls (KBA-400s) to improve workflow and address questions customers have raised in the past. Refer to KCO-001 for more descriptive changes and roll forward considerations.
- A new comments table in AUD-100 Engagement-Level Tailoring Questions to document any information you want to capture related to tailoring.

- Enhanced instructions and procedures throughout the toolset to improve workflow.
- A new example planned response to Management Override of Controls in KBA-502 which flows to the AUD-800 series. This can be modified in the risk pane for the Financial Statement Level Risk of Management Override of Controls and should be modified by the user based on the specific audit.

Additional Information on Knowledge Coach and the KBA Methodology

Knowledge-Based Audit (KBA) Methodology

Allows the results of one set of procedures to become the input for the next. The key components of the KBA methodology include:

- An Overview that guides auditors through the methodology (for single audits, auditors can refer to the applicable Overview in Knowledge-Based Audits of Governmental Entities or Knowledge-Based Audits of Not-for-Profit Entities);
- Knowledge-Based Audit documents, integral to the risk assessment and overall audit processes, which contain steps and procedures required by U.S. GAAS, GAGAS, the OMB Compliance Supplement and the Uniform Guidance;
- Customizable Audit Programs that take auditors through related steps and procedures;
- Practice Aids to help auditors complete steps or processes outlined in the Knowledge-Based Audit documents and Audit Programs;
- Auditor's Reports that provide a variety of sample auditor's opinions on audited financial statements and the accompanying internal control and compliance reports required by GAGAS, the OMB Compliance Supplement and the Uniform Guidance; and
- Correspondence documents that provide sample letters to be used to comply with U.S. GAAS, GAGAS, the OMB Compliance Supplement and the Uniform Guidance requirements and in many other common situations.
- The AICPA's Auditing Standards Board's (ASB) Risk Assessment Standards, AU-C Section 935, Compliance Audits and the Uniform Guidance - The practice aids and tools in the 2017 Knowledge-Based Single Audits are designed around the AICPA's risk assessment and clarified standards to assist auditors of single audits by:
 - Facilitating compliance with GAAS and GAGAS, the OMB Compliance Supplement and the Uniform Guidance;
 - Encouraging more effective audits through tailored audit programs and comprehensive practice aids;
 - Helping auditors to focus on and respond to identified audit risks; and
 - Enhancing audit documentation.

CCH® ProSystem fx® Knowledge Coach

Knowledge Coach functionality allows auditors to use the Knowledge-Based-Audit methodology more efficiently by eliminating the need for duplicate entry of the same information, tailoring audit documentation to each particular engagement, and documenting the link between risks identified and procedures performed. AUD-100S Tailoring Question is a document in Knowledge Coach that presents engagement-level questions designed to aid in tailoring the engagement documentation to fit each client. Completing the questions helps the auditor avoid duplication and unnecessary workpapers.

Note: Before you begin your audit, please review the guidance in AUD-101S Overall Audit Program. This workpaper is intended to be your road map through a Knowledge-Based Audit methodology. You should start your audit with AUD-100S Tailoring Question Workpaper and AUD-101S Overall Audit Program.

- **Risks**
Can be captured via the Risk Summary task pane from any Knowledge Coach workpaper by the current editor of KBA-502S Summary of Risk Assessments of Risks of Noncompliance. This allows the user to continuously assess risks during the engagement. Several workpapers prompt the consideration of the presence of risks, but the Risk Summary task pane must be used to document those risks. All documented risks flow to the Risk Summary. To ensure risks show in findings tables, make sure to check the "workpaper identified in" field of the Risk pane.
- **Information Flow**
Helps cut down on the time spent duplicating information across forms. In addition, the flow of consistent information ensures that information and updates to information are not missed between workpapers. Drill-down functionality helps the user navigate quickly to the source of the information, aiding in the review of the audit file.

- Diagnostics**
 Help keep track of unresolved issues like unanswered questions, incomplete risks, program steps not linked to risks or relevant assertions, missing workpaper, and more.
- Links to Accounting Research Manager (ARM)**
 If you subscribe to an ARM library that includes audit content, you can link directly to source material from Resources within Knowledge Coach workpapers. These links have been updated to reference to the accounting standards under the FASB and GASB Accounting Standards Codifications and the auditing standards issued by the AICPA and the U.S. Government Accountability Office (GAO). Also, if you subscribe to the Knowledge-Based Single Audit Guide on ARM, you can take advantage of links to the audit guide material from within the Knowledge Coach documents.
- Interpretive Guidance**
 It is integrated into each Knowledge Coach template through the Tips view of each new task pane. Informational features include Practice Points, Examples, Optional Workpapers, and Resources to help auditors work more effectively and efficiently. You can also navigate from Resources within a document or the tip pane directly to CCH's Accounting Research Manager and industry audit guides by simply clicking on the Reference.
