ProSystem fx
Knowledge Coach
February 2015

Welcome to the latest version of *2015 Knowledge-Based Audits: International Audits (2/13/2015)*, the latest title available in the ProSystem fx® Knowledge Coach series!

Please review this bulletin prior to installation and use. If you have any questions, call Technical Support at 1-800-PFX-9998, option 4.

Knowledge-Based Audits: International Audits is designed to help the auditor efficiently and effectively perform financial statement audits of non-public international entities in accordance with International Standards on Auditing (ISAs). The knowledge-based audit is a risk-based methodology that emphasises using knowledge of the entity to make risk assessments in connection with a financial statement audit. This allows the auditor to more appropriately focus audit efforts on those areas which in the auditor's judgement are the most significant and pose the most risk to the financial statement audit. The operations of international entities are often unique and complex and require specialised accounting and auditing knowledge. This edition includes specific up-to-date guidance for auditing international entities.

This guide includes interpretive guidance, workpapers, review programs, checklists, and correspondence necessary to complete reviews of interim financial information in accordance with ISRE 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity, should this be required as part of the engagement.

Conducting audits of international entities requires the exercise of the auditor's professional judgement. Additionally, the operations of international entities are often unique and complex and require specialised accounting and auditing knowledge.

This document is published for the purpose of communicating, to users of the toolset, updates and enhancements included in the current version. This document is not, and should not be used as an audit programme to update the audit documentation of an engagement started in a previous version of this product.

This is the second update to this Knowledge Coach title. If you are updating from a previous version of this title, refer to the Knowledge Coach User Guide Chapter 12. The guide is found on the Engagement File Room Help menu.

The 2015 documents include Accounting Research Material links to specific guidance that provides instant access to detailed analysis related to the steps and processes discussed in the workpapers.

For more information on the Knowledge-Based Methodology and how it works within ProSystem fx® Knowledge Coach, refer to the [Additional Information](#) section in this bulletin.

Additional Information on Knowledge Coach and the KBA Methodology

Knowledge-Based Audit (KBA) Methodology - Allows the results of one set of procedures to become the input for the next. The key components of the KBA methodology include:

- An **Overview** that guides auditors through the methodology;
- **Knowledge-Based Audit** documents, integral to the risk assessment and overall audit processes, which contain steps and procedures required by the ISAs;
- Customisable **Audit Programmes** that take auditors through related steps and procedures;
- **Practice Aids** to help auditors complete steps or processes outlined in the Knowledge-Based Audit documents and Audit Programmes;
- **Auditor's Reports** that provide a variety of sample auditor's opinions on audited financial statements; and
- **Correspondence** documents that provide sample letters to be used to comply with ISA requirements and in many other common situations.

The International Auditing and Assurance Standards Board's (IAASB) Risk Assessment Standards - The practice aids and tools in the *2014 Edition of Knowledge-Based Audits: International Audits* are designed around the IAASB's risk assessment standards to assist auditors of non-public international entities by:

- Facilitating compliance with ISAs;
- Encouraging more effective audits through tailored audit programmes and comprehensive practice aids;
- Helping auditors to focus on and respond to identified audit risks; and
- Enhancing audit documentation.

ProSystem fx® Knowledge Coach

ProSystem fx® Knowledge Coach functionality allows auditors to use the Knowledge-Based-Audit methodology more efficiently by eliminating the need for duplicate entry of the same information, tailoring audit documentation to each particular engagement, and documenting the link between risks identified and procedures performed. **AUD-100 Tailoring Question Workpaper** is a document in Knowledge Coach that presents engagement-level questions designed to aid in tailoring the engagement documentation to fit each client. Completing the questions helps the auditor avoid duplication and unnecessary workpapers.

Before you begin your audit, please review the guidance in **AUD-101 Overall Audit Programme**. This workpaper is intended to be your road map through a Knowledge-Based Audit methodology. You should start your audit with **AUD-100 Tailoring Question Workpaper** and **AUD-101 Overall Audit Programme**.

Risks can be captured via the Risk Summary task pane from any Knowledge Coach workpaper by the current editor of **KBA-502 Summary of Risk Assessments**. This allows the user to continuously assess risks during the engagement. Several workpapers prompt the consideration of the presence of risks, but the Risk Summary task pane must be used to document those risks. All documented risks flow to the Risk Summary. To ensure risks show in findings tables, make sure to check the "workpaper identified in" field of the Risk pane.

Information Flow helps cut down on the time spent duplicating information across forms. In addition, the flow of consistent information ensures that information and updates to information are not missed between workpapers. Drill-down functionality helps the user navigate quickly to the source of the information, aiding in the review of the audit file.

Diagnostics help keep track of unresolved issues like unanswered questions, incomplete risks, programme steps not linked to risks or relevant assertions, missing workpaper, and more. Diagnostics now show when a form table has not been answered (i.e. tables in **KBA-101 Overall Audit Strategy** that are added by the tailoring questions in **AUD-100 Tailoring Question Workpaper**).

Links to Accounting Research Manager (ARM)-If you subscribe to an ARM library that includes audit content, you can link directly to source material from Resources within Knowledge Coach documents. These links have been updated to reference to the accounting standards under the FASB Accounting Standards Codifications and the auditing standards issued by the AICPA. Also, if you subscribe to the *Knowledge-Based Audits: International Audits Guide* on ARM, you can take advantage of brand new links to the audit guide material from within the Knowledge Coach documents.

Interpretive Guidance is integrated into each Knowledge Coach template through the Tips view of each new task pane. Informational features include Practice Points, Examples, Optional Workpapers, and Resources to help auditors work more effectively and

efficiently. We have also added the ability to navigate from Resources within a document or the tip pane directly to CCH's Accounting Research Manager and industry audit guides by simply clicking on the Reference.
