

2009 Knowledge-Based Audits™ of Healthcare Entities

Description

AICPA's Auditing Standards Board's new Risk Assessment Standards are supported with new practice aids and tools to make the most of the latest technology to address the new audit requirements and subsequent processes auditors will need to implement. The KBA will assist auditors of commercial entities by:

- ◆ Facilitating compliance with GAAS
- ◆ Encouraging more effective audits through customized programs and comprehensive practice aids
- ◆ Helping auditors to focus on and respond to identified risks
- ◆ Enhancing audit documentation

A new Knowledge-Based Audit Methodology allows the results of one set of procedures to become the input for the next.

The key components of the KBA Methodology include:

- ◆ An overview that guides auditors through the new methodology
- ◆ Audit programs that take auditors through related steps and procedures
- ◆ Practice aids to help auditors complete steps or processes outlined in related documents
- ◆ Auditor's reports that provide a variety of sample auditor's opinions on audited financial statements
- ◆ Correspondence documents that provide sample letters to be used in many common situations.

Interpretive Guidance is integrated into each Knowledge Tools template through the Tips view of each new task pane. Informational features include Practice Points, Audit Alerts, Examples, Optional Workpapers, and Resources to help auditors work more effectively. New to this title, we have added the ability to navigate from Resources within a document or the Tip pane directly to CCH's Accounting Research Manager by simply clicking on the Resource link.

The 2009 Edition of *Knowledge-Based Audits of Healthcare Entities* is current through SAS-114.

Important Roll Forward Information

Due to changes made in our documents to ensure they are compliant with standards, some information will not roll forward. To ensure as much information as possible will roll forward, please do not roll forward from the 2007 *Knowledge-Based Audits of Healthcare Entities* to the 2009 *Knowledge-Based Audits of Healthcare Entities* title until you have installed the ProSystem fx Engagement release 5.7.1.

[Release Bulletin](#)

The following 2009 Knowledge-Based Audits of Healthcare Entities.exe download is a password protected self-extracting file that contains the 2009 Knowledge-Based Audits of Healthcare Entities.msi installation file.
