Firms using forms to regulate statutory due dates in projects can take advantage of updated form due dates by downloading the new e-*fx* Update. Project forms are updated to reflect new federal and state government forms as well as new extension dates on existing forms in the ProSystem *fx* Practice 8.1.1 release. Updates to the small business forms are also available when importing forms. To reflect changes in forms on open projects, the associated forms require re-import into the firm library and on the project.

Program updates vary in size dependent upon the programs installed to your system. Factors such as modem speed and Internet traffic can impact the download time. We recommend using a high speed modem (56K), DSL, cable modem, or T1 line to optimize your download times.
