Tax Updates

2023 Tax Updates

Below are some of the major changes anticipated for tax year 2023; some items in this list may not be available in the initial release but will be included in a future release.

Laser Print Suppression. The following states require us to suppress the laser printing of forms in a draft or unapproved state as noted below.

States not allowing draft print of forms or unapproved final version of the forms:

| | | |
|----------|---------------|----------------|
| Arkansas | Montana | Pennsylvania |
| Georgia | New York | South Carolina |
| Kansas | New York City | Texas |
| Michigan | Oklahoma | Virginia |

All draft or unapproved forms from these states will appear in the tax application with a watermark; however, when printed all forms will print on a blank page with only input amounts and a watermark to indicate the form is not approved for filing until it is final.

Note: Michigan requires us to not show the form in the application until approval is obtained; therefore, they will appear blank in the application.

Schedule K-3 Foreign Transactions. Foreign transactions from K-3 have been moved to a section under Passthroughs and redesigned to make input easier. (Worksheet View)

Option to exclude information from Schedule B was added to Interest > Foreign > Exclude record from Schedule B and Dividends > Foreign > Exclude record from Schedule B (Interview Forms IRS-1099INT, Box 166 and IRS-1099DIV, Box 163).

- This option was requested to make it easier to enter 1099s where there is more than one foreign country. This entry is designed to be used where only foreign if different information is used.
 - ◆ Regardless of entries on the 1099, all information will be excluded from Schedule B when this field is checked.
 - ◆ When the field is checked, only the amount fields in the Foreign section should be used. If the box is checked and there are entries in the amount fields other than Foreign amount fields, that information is ignored on Schedule B and is considered bad input. A caution diagnostic is issued when the new option is checked and there are entries other than foreign input.
