# 2012 Knowledge-Based Audits™ of Real Estate Entities: Clarified (11/21/12) for Knowledge Coach

ProSystem *fx*® Knowledge Coach November 2012

Release Bulletin

Welcome to the Clarified version of 2012 Knowledge-Based Audits of Real Estate Entities: Clarified (11/21/12), the latest title available in the ProSystem fx Knowledge Coach series! Please review this bulletin prior to installation and use. If you have any questions, call Technical Support at

1-800-PFX-9998 (1-800-739-9998), option 4.

The 2012 Knowledge-Based Audits of Real Estate Entities is designed to help the auditor efficiently and effectively perform financial statement audits of nonpublic real estate entities in accordance with auditing standards generally accepted in the United States of America (GAAS). The knowledge-based audit is a risk-based methodology that emphasizes using knowledge of

the entity to make risk assessments in connection with a financial statement audit. This allows the auditor to more appropriately focus audit efforts on those areas in which the auditor's judgment is the most significant and poses the most risk to the financial statement audit. The operations of real estate entities are often unique and complex, requiring specialized accounting and auditing knowledge. This edition includes specific up-to-date guidance for auditing real estate entities. Conducting audits of real estate entities requires the exercise of the auditor's professional judgment. This document is published for the purpose of communicating updates and enhancements included in the current version to users of the toolset. This document is not, and should not be used as, an audit program to update the audit documentation of an engagement started in a previous version of this product.

This is the fourth update to this Knowledge Coach title. If you are updating from a previous version of this title, refer to Chapter 12 of the Knowledge Coach User Guide. The guide is found on the Engagement File Room Help menu.

The 2012 documents include Accounting Research Material links to specific guidance that provides instant access to detailed analysis related to the steps and processes discussed in the workpapers.

For more information on the Knowledge-Based Methodology and how it works within ProSystem fx Knowledge Coach, refer to the Additional Information section in this bulletin.

# Additional Information on the KBA Methodology and Knowledge Coach

#### **KBA Methodology**

**The Knowledge-Based Audit (KBA) Methodology -** Allows the results of one set of procedures to become the input for the next. The key components of the KBA methodology include:

- An **Overview** that guides auditors through the methodology
- Knowledge-Based Audit documents, integral to the risk assessment and overall audit processes, which contain steps and procedures required by GAAS
- Customizable Audit Programs that take auditors through related steps and procedures
- Practice Aids to help auditors complete steps or processes outlined in the Knowledge-Based Audit documents and Audit Programs

- Facilitating compliance with GAAS
- Encouraging more effective audits through tailored audit programs and comprehensive practice aids

- Enhancing audit documentation

# ProSystem fx Knowledge Coach

**ProSystem fx Knowledge Coach** functionality allows auditors to use the Knowledge-Based Audit methodology more efficiently by eliminating the need for duplicate entry of the same information, tailoring audit documentation to each particular engagement, and documenting the link between risks identified and procedures performed. **AUD-100 Tailoring Question Workpaper** is a document in Knowledge Coach that presents engagement-level questions designed to aid in tailoring the engagement documentation to fit each client. Completing the questions helps the auditor avoid duplication and unnecessary workpapers.

Before you begin your audit, please review the guidance in **AUD-101 Overall Audit Program**. This workpaper is intended to be your road map through a Knowledge-Based Audit methodology. You should start your audit with **AUD-100 Tailoring Question Workpaper** and **AUD-101 Overall Audit Program**.

**Risks** can be captured via the Risk Summary task pane from any Knowledge Coach workpaper by the current editor of **KBA-502 Summary of Risk Assessments**. This allows the user to continuously assess risks during the engagement. Several workpapers prompt the consideration of the presence of risks, but the Risk Summary task pane must be used to document those risks. All documented risks flow to the Risk Summary. To ensure risks show in findings tables, make sure to check the "workpaper identified in" field of the Risk Summary task pane.

**Information Flow** helps cut down on the time spent duplicating information across forms. In addition, the flow of consistent information ensures that information and updates to information are not missed between workpapers. Drill-down functionality helps the user navigate quickly to the source of the information, aiding in the review of the audit file.

**Diagnostics** help you keep track of unresolved issues like unanswered questions, incomplete risks, program steps not linked to risks or relevant assertions, missing workpaper, and more. Diagnostics now show when a form table has not been answered (i.e. tables in **KBA-101 Overall Audit Strategy** that are added by the tailoring questions in **AUD-100 Tailoring Question Workpaper**).

**Links to Accounting Research Manager (ARM) -** If you subscribe to an ARM library that includes audit content, you can link directly to source material from Resources within Knowledge Coach documents. These links have been updated to reference the accounting standards under the FASB Accounting Standards Codifications and the auditing standards issued by the AICPA. Also, if you subscribe to the *Knowledge-Based Audits of Real Estate Entities* Guide on ARM, you can take advantage of brand new links to the audit guide material from within the Knowledge Coach documents.

**Interpretive Guidance** is integrated into each Knowledge Coach template through the Tips view of each new task pane. Informational features include Practice Points, Examples, Optional Workpapers, and Resources to help auditors work more effectively and efficiently. We have also added the ability to navigate from Resources within a document or the tip pane directly to CCH's ARM and industry audit guides by simply clicking on the ARM reference.
