2020 GOVERNMENT ENTITIES OVERVIEW FOR KNOWLEDGE COACH USERS

PURPOSE

This document is published for the purpose of communicating, to users of the toolset, updates and enhancements included in the current version. This document is not, and should not be used as an audit program to update the audit documentation of an engagement started in a previous version of this product.

WORKPAPER UPDATES AND ROLL FORWARD NOTES

General Roll Forward Note:
You must be the current editor of all Knowledge Coach workpapers to update to the latest content, and you must be the current editor upon opening the updated workpaper for the first time to ensure you see the updated workpaper.

The 2020 Knowledge-Based Audits of Governmental Entities have been updated to help auditors conduct efficient and effective audit engagements in accordance with U.S. GAAS and GAGAS and to take into account the latest literature, standards, and guidance, including the 2018 Revision of the Yellow Book (GAGAS) and practice points regarding AICPA Statement on Auditing Standards (SAS) No. 134, Auditor Reporting and Amendments, Including Amendments Addressing Disclosures in the Audit of Financial Statements, SAS No. 135, Omnibus Statement on Auditing Standards – 2019, and SAS No. 137, The Auditor’s Responsibilities Relating to Other Information Included in Annual Reports, which do not provide for early implementation. The 2020 tools include links to detailed analysis related to the steps and processes discussed in the workpapers. Many new tips and examples have been incorporated. Also included are revised financial statement disclosures checklists that provide a centralized resource of the required and recommended U.S. GAAP disclosures and key presentation items currently in effect, using the style referencing under the FASB Accounting Standards Codification™.

Note that the 2018 revision of the Yellow Book takes effect for audits of financial statements for periods ending on or after June 30, 2020. As early implementation is not permitted, the 2020 edition of Knowledge-Based Audits of Governmental Entities should not be used for audits of financial statements ending before June 30, 2020. Please refer to the 2019 edition of Knowledge-Based Audits of Governmental Entities for those audits.

The 2020 edition of Knowledge-Based Audits of Governmental Entities includes the following updates:

Roll Forward Note: All Noncomplex forms (KBA-201N, KBA-302N, and KBA-401N) have become obsolete and combined with the prior Complex documents. If you have used a Noncomplex document in your prior engagement, before rolling that file forward, you must add the Complex document to your engagement binder to retain the data from the Noncomplex document, then remove these workpapers from the prior year binder after you have rolled the binder forward.

If your binder has already been finalized and you don’t want to unfinalize the binder to insert the Complex document before you roll forward from the 2019 version, you are able to make a copy of your finalized binder, insert the applicable Complex documents, then roll forward the copied binder to the 2020 title version. After roll forward remember to delete the copied prior year binder from your file room. Doing this will retain the data into the 2020 combined versions.

Alternatively copy and paste the data from the prior year Noncomplex document, from the prior year binder, after you roll forward into the current combined versions. The Noncomplex document will roll forward as an obsolete workpaper with no data and will need to be removed after you have rolled forward your binder. You will need to refer to your prior year binder for data in the Noncomplex document.

For the Update Knowledge Coach Content option, you should insert the complex version of the workpaper prior to updating; this will retain information from the now obsolete noncomplex version. We recommend publishing the noncomplex versions prior to selecting the Update Knowledge Coach Content option so you have access to the data after updating, as the noncomplex version will be obsolete.

**KBA-105 Review of Significant Accounting Estimates**

Type: Modify  Description: Added practice point regarding the prevalence of peer review concerns related to significant estimates.

**KBA-200 Entity Information and Background**

Type: Modify  Description: Added new flow of question, “Describe the users or expected users of the financial statements (e.g., city council, school board, state regulatory entity, state auditor):” to **KBA-301**

**KBA-201 Client/Engagement Acceptance and Continuance Form**

Type: Modify  Description: Combined **KBA-201** and **KBA-201N** giving the auditor the option to memo or complete the detailed table for each section.

User will need to answer Tailoring Question under each section if the user will document the consideration in memo format or complete the detailed table.

**KBA-201N Client/Engagement Acceptance and Continuance Form: Non-Complex Entities**

Type: Modified  Description: Modified findings table to reword floatie option, “Non-Compliance, Violation or Abuse” to “Non-Compliance or Violation”

*Findings will retain on roll forward if user selects to keep all responses on roll forward.*

Information from **KBA-201** will retain on roll forward except the findings table if the user uses the default roll forward settings. To retain all, the user would need to select to keep all responses on roll forward.

If the user used **KBA-201N** in the prior year then all information except for the acceptance/continuance decision will retain from **KBA-201N** if one of the first two options in the Roll Forward Note above is performed. Please see Roll Forward Note at the top of this file for further information.

| **Added**    | Added practice point and new step, under “Confirming Accounts Payable” as follows:  
**Practice Point:** Properly controlled electronic confirmations may be considered reliable audit evidence. If using electronic confirmations, the auditor should ensure that a process or mechanism exists to minimize the possibility that the results will be compromised because of interception, alteration, or fraud. The auditor should consider the risk that:  
- The confirmation response might not be from the proper source;  
- A respondent might not be authorized to respond; and  
- The integrity of the transmission might have been compromised.  
When access codes or information necessary to access the confirming party’s data is provided to the auditor by management, evidence obtained by the auditor from access to such information does not meet the definition of an external confirmation.  
**Practice Point:** Even though a schedule of confirmation results is prepared, the auditor should retain returned confirmations, as they often serve as significant evidence to the assertions being tested, and seasoned judgment is often needed in evaluating confirmations that identify the nature and extent of exceptions.  
We identified the appropriate individual, one with adequate knowledge of the information to be confirmed, to receive the confirmation. |

## RELATED, FOUNDATIONS AND ASSOCIATION WORKPAPERS FOR THIS TITLE

Related workpapers are Knowledge Coach Word workpapers where information flows in or out of tables within the workpaper. Some of these related workpapers are Foundation workpapers or associated workpapers.

Foundation Workpapers include most of the Communication Hub workpapers, which are central to the Knowledge-Based Audit Methodology used by the Knowledge Coach titles. Associated workpapers require you to associate them with custom values, such as audit areas, specialists, service organizations, and other items. Workpapers require an association when you need to have more than one instance of a particular Knowledge Coach workpaper in your binder for each type of item to which the workpaper is related. Making this association allows Knowledge Coach information to flow properly between workpapers.
